Since the late 1950s, the companies that today make up Alderley have been at the forefront of the oil and gas engineering industry. Today, our highly skilled staff – based in the UK, Dubai, Saudi Arabia and Singapore – deliver world-class products, services and training from project inception to design and lifetime care and maintenance.

Our experience includes all metering techniques in varied applications along with provers, analytical and control systems.

We are conversant with current standards and cutting edge technologies for metering solutions and have provided some of the largest and most sophisticated metering systems in the world, in some of the most challenging regions.

**Course Dates**

A full list of scheduled training dates are available on our website.

**Who Should Attend?**

Alderley's training courses are developed to cater to a broad spectrum of employees within your company and would ideally suit:

- Metering Technicians
- Maintenance Technicians
- Maintenance Engineers
- Operators
- Supervisors
- Hydrocarbon Accountants

**Alderley Training Locations**

- Dubai
- Dammam
- Wickwar
- Singapore

Alderley can also offer group training on-site, or at a location of choice for all metering courses and bespoke training.

**Assessments**

We also offer pre and post assessment tests, which enable you to clearly see the knowledge gained upon completion of a course at Alderley, providing evidence of continuing professional development.

**Alderley Metering Courses**

- Flow Measurement - Basics
- Flow Measurement - Liquid
- Flow Measurement - Gas
- Proving and Calibration

**Alderley Bespoke Training**

Alderley can provide detailed training courses that are tailored to your specific project needs.

For every bespoke course Alderley will provide in-depth information and guidance to assist operators, maintenance engineers and technicians in the best operation of their Alderley supplied equipment.

**Registering for a Course**

To register please complete the training request form or visit our website.

 Discounts are offered to repeat customers and group bookings.
Alderley

Training Courses

Flow Measurement - Basics
1 Day
- Basic Flow Measurement Devices
- Principles of Operation
- Liquid Flow Measurement
- Gas Flow Measurement
- Metering Skid Tour
- Flow Computer / Controls

Flow Measurement - Liquid
3 Days
- Flow Measurement Basics
- Liquid Flow Meters
- Measurement Standards
- Meter Curves
- Provers - Principle of Operation
- Metering Best Practices

Flow Measurement - Gas
3 Days
- Flow Measurement Basics
- Gas Flow Meters
- Measurement Standards
- Check Metering
- Chromatographs
- Metering Best Practices

Proving and Calibration
3 Days
- Types of Prover
- Principles of Operation
- Water Draw Techniques
- Meter Curves
- Fault Analysis

Operations and Maintenance - Flow
- Flow Meters
- Gas Analysers
- Sampling and Fast Loop Systems
- Provers
- Flow and Supervisory Computers

Operations and Maintenance
- Project Specific
- Flow Meters
- Proving / Check / Master Metering
- Density Measurement
- Gas Composition Analysis
- Control Systems
