

Alderley

Technical excellence: delivered

Parts and Spares Management

Minimising costs and reducing downtime through a simplified supply chain

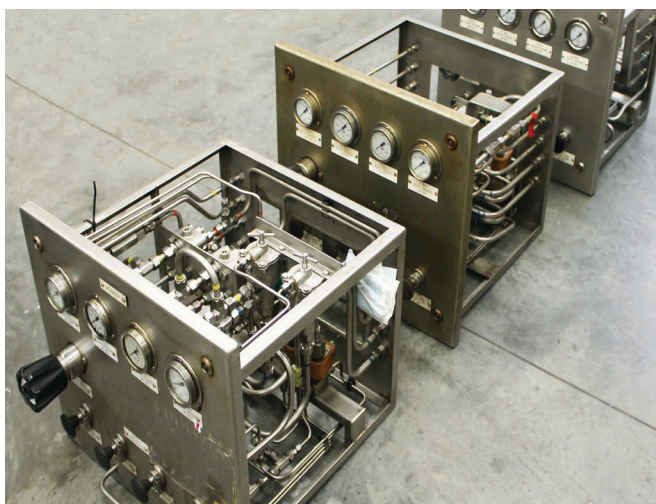

One-stop Shop

Alderley offer dedicated spares management services, allowing you to access parts as and when needed. Drawing upon their intimate knowledge of the equipment, our technicians are able to help with any maintenance planning and scheduling to ensure you only exchange parts when you need to – further maximising your uptime. And in the event that a spare part is no longer available, you can trust our expertise to advise you on suitable alternatives.

Whether it is instrumentation, valves or controls our dedicated services team and technical valve specialists will source the right equipment you need to suit both the application and environment conditions.

When it comes to selecting equipment, Alderley is totally independent and can advise on the best equipment to any international standard. Through our worldwide supply chain we can meet bespoke requirements with the flexibility required to keep our customers' operations running smoothly.

Example portfolio of equipment components:

Valves

- Ball valves
- Globe valves
- Gate valves
- Slide Gate valves
- Knife Gate valves
- Safety and pressure valves

Other process components:

- Meters
- Actuators
- Vent panels
- Bursting discs and holders
- Flame and detonation arrestors

Tank Protection:

- Tank protection valves
- Pressure vacuum valves
- Manways
- Tank lids
- Tank blanketing valves

Spares Management

Alderley can help customers plan their Operational Expenditure (OPEX) as well as assist in reducing costs associated with downtime and carrying excess inventory through planned maintenance schedules and spares management. As part of our spares management, we can offer:

- Ad hoc spares
- Commissioning spares
- 2 years' spares
- A spares inventory review
- Obsolescence management support

Global Strength, Local Expertise

Our global purchasing network, rigorous vetting process of suppliers and assured quality of spare components ensure that all parts are compliant with international standards – keeping your equipment safe and within its designed parameters – and available at the best value.
